Declaration

I declare that this Bachelor Project is all my own work and I have cited all sources I have used in the bibliography.

In Prague

.....
Edita Pešková

Acknowledgements

I wish to thank to my supervisor for his inspiring feedback, my family for their patience and support in my studies and anyone who encouraged me in this project.

Edita Pešková

Název práce:

Návrh informačního systému pro podporu forenzního auditu

Autor: Edita Pešková

Obor: Applied Information Technology

Druh práce: Bakalářská práce

Vedoucí práce: Mgr. Karel Macek, Ph.D.

Oddělení ekonometrie, Ústav teorie informace a automatizace

Konzultant: —

Abstrakt: Tato bakalářská práce předkládá návrh systému a naznačuje požadavky, které jsou potřebné aby byl popsán smysl a cíle technik digitálního forenzního vyšetřování, vykonávaných forenzními auditory, účetními a inpektory firem. Pomocí různých postupů, nástrojů a technik rozpoznáváme v jakých případech mohou nástroje forenzního auditu poskytnout auditorům potřebné informace k provedení forenzního auditu. Bakalářská práce představuje požadavky, které musí splňovat vlastní informační systém použitelný pro podporu vyšetřování a také poskytuje detailní návrh tohoto systému.

Klíčová slova: Forenzní audit, Vyšetřování, Návrh systému, Databáze, Sběr dat

Title:

Design of an Information System for Support of Forensic Audit

Author: Edita Pešková

Abstract: This bachelor project proposes a system design and suggests requirements that are needed in order to describe the purpose and goals of the digital forensic investigation techniques carried out by the forensic auditors, accountants and examiners of companies. Using various procedures, tools and techniques we identify where the forensic audit tools and the system can provide the auditors necessary information to carry out forensic audit. This bachelor thesis provides requirements that our own information system usable to support forensic audit must follow and also provides a detailed design of this system.

Key words: Forensic audit, Investigation, System design, Database, Data collection

Introduction

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language. klicova slova: forenzni audit, unik penez, prosetreni spolecnosti, vyhledavani dukazu, pocitacova podpora, aplikace podporujici forenzni audit, vizualizace procesu vysetrovani, report o vysetrovanem pripadu, metodika forenzniho auditu, navrh informacniho systemu, ...

Chapter 1

Forensic audit and its computer support

na zacatek shrnout co vsechno obsahuje tato kapitola. asi tak takhle:

This chapter strives to define and explain the meaning of the term "forensic audit" as well as other terms related to this field. We demonstrate typical roles and outline the process.

1.1 Definition of Forensic audit

co je to forenzní audit Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like "Huardest gefburn"? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

v hrubých rysech jak to probíhá (to co už mám sem patri), na základě toho, co jsem zjistila FA funguje takto:...

Chapter 2

Original methodology for the (computer aided) forensic audit

Jsem si vedoma, ze jsem clovek, který to nikdy nedělal (= omezená znalost). Toto je jak to chápu. Toto není jak by to někdo měl dělat. Toto je seriózní pokus popsat proces forenzního auditu. PROCESNÍ DIAGRAMY!!!

vystupem = okomentovaný obrázek, který dává hlavu a patu

a Use case diagrammem pak kontaktovat praxi

Chapter 3

tato kapitola by asi mela obsahovat odvodnene pozadavky na vlastni metodiku, pouzitelnou ve FA s ohledem na ostatni pristupy a metodiky

DOTAZ:co jsou osatni pristupy a metodiky?

DOTAZ:jaky je rozdil mezi metodikou, kterou uz mam vytvorenou v arisu a touto vlastni metodikou?

Chapter 4

Design of an information system for support of forensic audit

vsechno o tom systemu jako takovem, ale tak, aby to navazovalo na predchozi...?

prostredi webu + silne zabezpeceni, reporty, export, pdf

maly informativni obrazek, který poskytne uzivateli informaci o tom, co se stalo

! pripojit pripady uziti vcetne zavislosti

jedna se o aplikaci, která provazi celým projektem (zadáním) forenzního auditu. sice existují i jiné nástroje pro podporu takovýchto projektů, ale projekt má úseky a nám jde o integraci porízených výsledků

Chapter 5

Discussion

5.1 Further improvements

- pokryt dalsi administrativni casti (zacatek, konec)
- detailnejsi navrh a implementace
- detailnejsi osetreni rizik
- zamysleni nad sdilenim zkusenosti (duvernost vs. rust expertyzy auditorske spolecnosti)
- vyuziti mimo FA - jina administrativa + moduly pro vyuziti policii / soudy

pouzitelne technologie!
